# Envision 1.1 Release Notes

This Release Notes document provides a summary of the changes that have taken place in the Envision 1.1 release.

Note: Envision 1.1 supports, and requires, Akana Platform version 8.1.3.

## Installation

Installation instructions for Envision 1.1 are unchanged from Envision 1.0 which can be found at:

http://docs.akana.com/ev/envision_install/installing_envision.htm

## What's New in 1.1

### Envision 1.1 Features

The Envision 1.1 release includes the following new or updated features:

### Enhanced Metric Embellishment for Addresses

A standard metric embellisher has been introduced that will fill an address structure for a metric record in a data set based on a single address input field. An address dimension type is a structure that can contain a zip code, country, state, city, latitude, and longitude. When a metric record is fed to the system that contains a zip code, country, state, city, or IP Address the embellisher will attempt to fill in the rest of the address fields. This will provide support for generating maps using the collected metric data.

### Map Support

A new type of chart, a Map, has been introduced to graph metric data geographically. A large number of maps are available with the system including a world map, country maps, and state maps. Data can be plotted on these maps using address dimensions. The data can be plotted as bubbles, points, and regions.

### Envision Upgrade

The Envision release supports upgrading from Envision 1.0 to 1.1. After installing the 1.1 repository ,run the Akana Container Configurator and select the update option. Then, from the Admin Console, run any outstanding configuration tasks.

## *Database*

### *Akana MongoDB Support*

Envision uses MongoDB version 3.0 for all its persisted data.

# Customer Support

Akana offers a variety of support services by email and phone. Support options and details are listed below.

| Support Option | Details |
|---|---|
| Email | support@akana.com |
| Phone | 1-866-762-9876 |
| Support Site | The Support section of the Akana website at https://servicedesk.akana.com includes many product-related articles and tips that might help answer your questions. |
| Documentation Updates | We update our product documentation for each version. If you're not sure you have the latest documentation, send an email request to support@akana.com. Specify the product and version you're using. |
